

Good morning/afternoon Sir/Madam,

It's my pleasure to be interviewing with you. I am Shashthiga and currently pursuing my bachelors degree (Btech IT) in Bannari Amman Institute of Technology. I am an expert in Data Science and Software engineering.

Basically, I belong to tamilnadu. I have been living in namakkal for 20 years . Now I stay here with my family. Besides my parents, there is a younger brother in my family. Currently, I am exploring job opportunities in customer support as I have finished high schooling in SPK Gems(Namakkal)

I am very interested in computer programming and software. That was the reason I chose to pursue higher studies in AI and data science. Post that, my internship experience and other practical projects in the college further boosted my interest in softwares as a full-time career option. I enjoy going out with friends and trying new cuisines in my free time. I also enjoy watching movies, listening to music, reading, working out, and going on road trips.

I am looking forward to knowing more about this opportunity.
